

DENVER/ROCKY MOUNTAIN SECTION

ADVANCED EDUCATION

Changing Light for Health

Event:

Thursday,
March 1st, 2012

Location:

RNL Design
1050 17th St., Suite A200
Denver CO 80265

[MAP](#)

Event Schedule:

5:30pm-6:00pm Dinner and
Networking

6:00pm-8:30pm Presentation

8:30pm-9:00pm Q&A

[REGISTER](#)

ON-LINE PAYMENT ONLY

Members	\$75.00
Non-Members	\$90.00
Students	free
Emeritus	free

Cost includes dinner and
presentation handout.

We cannot envision our lives without electricity. This powerful invention has successfully extended our productive hours of the day well into the night. Electric lighting, television, computers, and handheld devices influence our visual system throughout the day and well into the evening hours. **How do these technologies affect our health?**

IESRMS will be offering an **advanced lighting seminar** covering the effects of lighting beyond our visual experience to our well-being and health. *Optical radiation influences our sleep behavior, our eating behavior, our alertness, and even our stress levels.* **How does this information influence how we design lighting in the future?**

You will be hearing about the most recent research and case studies on this topic, and learn about **lighting design approaches to support a healthy visual environment**. This course offers valuable insights and techniques for all design professionals who influence the built environment.

The companion IES Seminar Light & Health binder can be purchased separately when registering. This optional text features an extensive bibliography of references and elaborate scientific data, graphs and research on this topic.

This course qualifies for 3 hrs. of CEU's. It's a full night of learning and networking. We look forward to meeting you!

Sincerely,

IES Rocky Mountain Section/Denver

Speaker Bios

Lisa Barter, RA, NCIDQ, LEED AP 3i Design

Lisa is a lighting designer who's come into the field by way of architecture and interior design. Being an imaginative person in a family of doctors inspired her to marry art and science through the creative and technical aspects of lighting. Her architecture and interior design licensing renders her fluent in the entire design process, but her speciality and passion is lighting design.

Founded in 2005, 3i Design offers lighting design services for commercial projects ranging from higher education to retail and corporate, with an emphasis on lighting to support health. Recent projects include DaVita World Headquarters in Denver, Warrior in Transition at Fort Hood in Texas, Hyatt McCormick Place in Chicago, and ongoing projects at the University of Denver.

David Keith, FIES Marshall Design

David is a lighting consultant with over twenty-five years experience in design, project management, research, product development and education. He is an educator across all topics of lighting. He has taught at all levels and consulted internationally on technical textbooks and educational publications.

For decades he has been presenting timely information about technical lighting issues, covering lighting fundamentals and advanced topics including design, energy, controls and economics. He has also been teaching about recent findings concerning the interactions of lighting with the environment and human health. Some of his work is published in peer-reviewed journals, as well as contributing to publications such as pattern books and texts for professional lighting education. In recognition of his technical contributions, David has been honored as a Fellow of the IES.
